

## **Challenge #6 – HackOut Ninja Integration**

HackOut Ninja wants to get more communities interested in creating hackathons. We also want to support the innovative ideas that are generated at these hackathons.

Design a product or service for the hackathon community that HackOut Ninja can integrate into their platform.

### **Resources**

Below are some infographics with information that we have created regarding the hackathon space. Attached is an example of how a nonprofit used a hackathon (This is our proprietary content).
